

VIDEO DISTRIBUTION SYSTEM

5

Abstract of the Disclosure

The invention relates to video distribution systems and,
more particularly, to a system that blanket transmits video/audio
10 content such as movies (for example, via satellite downlink
transmission) to each customer's recording, storage and playback
system. Customers may preselect from a list of available movies
or other content in advance using an interactive screen selector,
and pay for the video/audio content that is actually viewed.
